RE: AS9100 Status: FTG Circuits Chatsworth

The AS9100 certificate for FTG Circuits Chatsworth is currently under an IAQG certificate extension:

Like many, due to COVID related travel and visitor restrictions FTG has delayed the recertification audit to the week of June 21 which is beyond the expiry date of the certificate.

IAQG issued “special circumstance” directives that the AS9100 registrars have adopted for audits and certifications that are delayed due to COVID.

SAI Global has provided an extension for performing our audit, currently this extension implies that our audit has to be performed before July 31 but may be extended further if needed.

The registrars are not issuing new certificates that show the extension date as this is not required by the IAQG guidance / treatment

But you can see that the certificate has been extended in Oasis, if you look up our certificate entry in Oasis you will see that our certificate number has been modified to CERT-0121367 **IAF ID-3**.

The **IAF ID-3** code at the end of the certificate number indicates that the certificate is still valid under the **IAF ID-3** process, (The IAQG COVID reaction Plan)

The snip below shows the current Oasis information for Circuits Chatsworth to show that the AS9100 certificate has been extended under the IAQG **IAF ID-3** directive.
